

### **Level 3: Automation Analyst**

**Eligibility:** Should be Practitioner Certified.

**Follow the Steps mentioned below to complete the Automation Analyst Certification process:**

1. Practitioners need to identify two automation opportunities as use cases.
2. Needs to be considered part of the mentors' pool in their respective BU/GBL.
3. Guide at least two foundation engineers in becoming practitioners in implementation of the identified use cases.
4. No separate intimation to Academy team required. Information will be collected from the Practitioner's use case submission form details.
